ABLE PLANET WINS SIX 2007 INTERNATIONAL CES INNOVATIONS DESIGN AND ENGINEERING AWARDS

Denver, Colorado (November 9, 2006) – Able Planet Inc., a leader in innovative technologies “For People with All Levels of Hearing™”, today announced that it won six awards from the 2007 International Consumer Electronics Show (CES); the six Honoree Awards included; Clear Harmony Noise Canceling Headphones (High Performance Audio); Able Talker & Clear Harmony Wireless Headphones (Wireless Peripherals); Able Talker Assistive Listening Device (Personal Electronics); Clear Harmony VoiP Headsets (Telephones category); Clear Harmony Headphones 200 Series (Audio Accessories); and Clear Harmony Gaming Headphones (Electronic Gaming). Products entered in this prestigious program are judged by a preeminent panel of independent industrial designers, engineers and members of the trade press to honor outstanding design and engineering in cutting edge consumer electronics.

Able Planet designs products with patent pending LINX AUDIO™ for people with normal hearing to those with severe and profound loss – For All Levels of Hearing™. In side-by-side comparisons with consumers and strategic partners, most people can “Hear the Difference™” in the sound quality and clarity of LINX AUDIO.

Able Planet installs patent-pending LINX AUDIO™ into audio and communication devices to provide richer sounding music and enhanced speech clarity for TV, portable DVDs, audio books, CD, MP3 or iPod players, and assistive listening devices. Enhanced sound quality and clarity is made possible by creating harmonics that are not masked by low frequency sounds, filtering undesirable frequencies or noise, and soft clipping distortion. Additionally, the enhanced audio signal increases the perception of loudness without increasing volume, enabling listeners to achieve full rich sound at lower volumes, which may lead people to “Turn it Down™” to preserve hearing.

“We are extremely honored to be recognized by the Consumer Electronics Association and to receive these prestigious Innovations Awards,” said Kevin Semcken, President & CEO. “Able Planet and its strategic partners are rapidly expanding LINX AUDIO™ product lines to enable people with all levels of hearing to live more full and enriched lifestyles.”

Able Planet’s LINX AUDIO™ products will be highlighted at the 2007 International CES, which runs January 8-11, 2007 in Las Vegas, Nevada. Come visit us at Innovations Plus at the Sands Pod #270, which showcases the hottest technologies in the consumer electronics industry, and Booth #69453.

About Able Planet:

Able Planet is an innovative technology company that designs and manufactures award-winning audio and communication devices For All Levels of Hearing™ and for hearing preservation. Through innovations such as the new patent-pending LINX AUDIO™, hundreds of millions of people with hearing loss will now have access to the world of sound and communications, and be able to participate in more active lifestyles. Able Planet markets its products through diverse distribution channels including; Direct, Audiology Networks, Resellers, Nonprofit Foundations and Strategic Partners.

About CES Innovations Awards:

As a widely renowned consumer technology awards program that began in 1989, the CES Innovations Awards recognize the best designed and engineered products. It is sponsored by CEA, the producer of the International CES, the world's largest consumer technology tradeshow, and endorsed by the Industrial Designers Society of America (IDSA), the voice of industrial design, committed to advancing the profession through education, information, community and advocacy.

Please visit www.ce.org for more information.
