ABLE PLANET PARTNERS WITH OUTSIDE THE BOX TO EMBED LINX AUDIO™ IN SOLITUDE™ NOISE CANCELING HEADPHONES

Denver, Colorado (June 16, 2006) – Able Planet, Inc., a leader in sound enhancement technologies for all levels of hearing, announced today that it has entered into a Manufacturing and Supply Agreement with Outside the Box to embed award-winning LINX AUDIO™ into Solitude™ noise canceling headphones.

Outside the Box, Inc., a leading developer of noise reduction and cancellation systems designed for applications in all dynamic environments, will feature the technology in all future Solitude headphones, including the soon to be released version displaying the Breast Cancer Awareness ribbon, in which a significant portion of the profits will go to breast cancer research.

Noise canceling headphones are one of the most rapidly growing markets in the world today. “Solitude has become a leader in noise cancellation, style, comfort and sound quality; and LINX AUDIO has clinically shown to enhance sound quality and speech intelligibility,” said David Dillinger, Executive Vice President of Outside the Box. “We believe the combination of our technologies will create a new standard for noise canceling headphones, and Outside the Box intends to lead the way.”

Able Planet, makers of LINX AUDIO, manufacturers and markets audio and communication products embedded with the award-winning technology. Independent studies show that LINX AUDIO provides superior sound quality, improves speech intelligibility, reduces distortion, restricts electromagnetic interference, and increases perceived loudness without increasing the volume control of the audio device.

“We are honored to have been selected by Outside the Box for their line of Solitude headphones,” said Kevin Semcken, President & CEO of Able Planet. “Now people with all levels of hearing will be able to enjoy music, listen to audio books, and use interactive computer software in a world of their own, no matter how busy life gets around them.”

About Able Planet:

Able Planet is an innovative technology company that designs and manufactures award-winning audio and communication devices for all levels of hearing and for hearing preservation. Through innovations such as the new patent-pending LINX AUDIO™, hundreds of millions of people with hearing loss will now have access to the world of sound and communications, and be able to participate in more active lifestyles. Additionally, LINX AUDIO helps preserve hearing by providing superior sound quality and speech clarity even at lower volumes enabling people to “Turn it Down™” without compromising full rich sound.
