ABLE PLANET EXPANDS CANADIAN DISTRIBUTION FROM COAST TO COAST

Denver, Colorado (June 16, 2006) – Able Planet, Inc., a leader in innovative technologies for all levels of hearing, announced today that Hall Telecommunications Supply Ltd. (Hall Telecommunications), has become an Able Partner, expanding distribution of LINX AUDIO™ products throughout Canada. Hall Telecommunications, a leading wholesale distributor of special needs products, has been the largest privately held Canadian distributor to this market for the past 32 years.

Hall Telecommunications has a history of success based on long standing relationships and leadership technologies. “We truly partner with our suppliers and our customers by providing only the highest quality products, service and solutions.” said Don Beam, President of Hall Telecommunications. “Hall Telecommunication Supply has evolved over the years by meeting the needs of the changing market, which has required us to identify and secure leading edge, life-changing technologies, like LINX AUDIO.”

Able Planet manufactures and markets audio and communication products embedded with the award winning LINX AUDIO (patent-pending). Independent studies show that LINX AUDIO provides superior sound quality, improves speech intelligibility, reduces distortion, restricts electromagnetic interference, and increases perceived loudness without increasing the volume control of the audio device.

“We are honored to have been selected by Hall Telecommunications,” said Kevin Semcken, President & CEO of Able Planet. “Now people with all levels of hearing, all across Canada, will be able to enjoy music, listen to audio books, use interactive computer software, and hear on telephones and cell phones.”

About Able Planet:

Able Planet is an innovative technology company that designs and manufactures award-winning audio and communication devices for all levels of hearing and for hearing preservation. Through innovations such as the new patent-pending LINX AUDIO™, hundreds of millions of people with hearing loss will now have access to the world of sound and communications, and be able to participate in more active lifestyles. Additionally, LINX AUDIO helps preserve hearing by providing superior sound quality and speech clarity even at lower volumes enabling people to “Turn it Down™” without compromising full rich sound.
